# FUTURE PACKS

Manufacturer & Importer of Machinery

## TECHNICAL SPECIFICATION

Folding width (mm)	20-30
Max diameter of coil	1200mm
Production capacity(pc/min)	25-35
Cutting width (mm)	400-800
Cutting length(mm)	1300
Dimension (LxWxH): 4300*5000*1200mm	5000 x 2400 x 1600 mm
Power & Voltage	5KW, 380V, 3Ph, 50Hz
Stitch length	8-12 mm
Air consumption	0.4-0.5 Cubic / hour

- ❖ Automatically complete fixed length hot cutting, folding, bottom sewing and bagging of the woven barrel cloth to save labor;
- ❖ After hot-cutting, the bag does not adhere and opens easily.
- ❖ Automatic counting, stackable feeding, adjustable quantity;
- ❖ PLC control, servo motor drive, accurate control of bag length;
- ❖ Pneumatic winding up, accurate photoelectric tracking edge rectification, easy operation, reliable quality, stable performance, low failure rate;
- ❖ The bottom of the bag sheet can be single and double folded, the folded edge is uniform, and the length of the thread head can be adjusted.
- ❖ The cutting tool is controlled by servo motor, which makes the cutting more stable, accurate and smooth.
